GraphOn's GO-Global Thin-Client Software to Be Showcased at CeBIT

SANTA CRUZ, CA, USA – March 8, 2007 – GraphOn Corporation (OTCBB:GOJO), a leading worldwide developer of thin-client, server-based computing solutions, announced today that several of its European distribution partners will be showcasing the company's GO-Global thin-client software at the CeBIT, the world's largest computer trade fair, in Hannover, Germany, March 15-21, 2007.

GO-Global is a fast, simple, and affordable application delivery solution that provides instant access to centrally-running Windows, UNIX and Linux applications from any location, platform and operating system. With GO-Global, there is no need to rewrite applications for the Web or deploy complex infrastructure such as Microsoft Windows Terminal Services or Citrix Presentation Server.

GraphOn partners who will be exhibiting GO-Global at CeBIT include:

- Acropolis Automation B.V. in Hall 3, Stand E21
- PCT Professional Communication Technologies GmbH in Hall 3, Stand A63
- SBC Distribution GmbH in Hall 4, Stand D48

"The thin-client, server-centric computing market in Europe is showing substantial strength, and we look forward to our multi-faceted participation at CeBIT this year," said John Dilworth, Vice President of Sales and Marketing at GraphOn.

According to a recent survey by the European Thin Client Forum (ETCF) and CMP-WEKA, the market in Europe for thin-client solutions is booming with double-digit growth. The research reveals that the principle reasons cited for deploying thin-client solutions include better security (78.4%), low cost of maintenance (76.7%), ease of installation (70.7%), scalability (69.8%), and high degree of flexibility (65.5%).

About GraphOn Corporation

GraphOn Corporation is a publicly-traded company headquartered in Santa Cruz, California. For over a decade, GraphOn has been an innovator of cost-effective, advanced solutions that help customers access applications from anywhere. GraphOn's high-performance software provides fast remote access, cross-platform connectivity, and a centralized architecture that delivers a dramatically lower cost of ownership. The company's solutions run under Microsoft (MSFT) Windows, Linux and UNIX, including Sun (SUNW) Solaris, IBM AIX, Hewlett-Packard (HPQ) HP-UX, and others. For more information, call 1.800.GRAPHON in the USA, +44.1344.668534 in Europe, or visit www.graphon.com.

This press release contains statements that are forward looking as that term is defined by the United States Private Securities Litigation Reform Act of 1995. These statements are based on current expectations that are subject to risks and uncertainties. Actual results will differ due to factors such as shifts in customer demand, product shipment schedules, product mix, competitive products and pricing, technological shifts and other variables. Readers are referred to GraphOn's most recent periodic and other reports filed with the Securities and Exchange Commission.
